PROFESSIONAL SUMMARY

Software Engineer with professional experience in AI Engineering, Full-Stack Development, and Retrieval-Augmented Generation (RAG) systems. Experienced in developing AI-powered applications, designing document ingestion pipelines, semantic search solutions, vector database integrations, and AI automation workflows using Large Language Models (LLMs). Proficient in Python, C#, .NET, React, Node.js, Docker, REST APIs, and SQL. Recently graduated with a Bachelor's degree in Computer Engineering from the Polytechnic Institute of Porto (ISEP). Passionate about Artificial Intelligence, Cloud Technologies, Secure Software Development, and Cybersecurity, with a long-term goal of becoming a Security Engineer.

ADDITIONAL INFORMATION

Interests: Cybersecurity, Artificial Intelligence, Cloud Computing, Application Security, Secure Software Development, Pentesting

WORK EXPERIENCE

AI Engineer Intern

It's Possible Tech • February 2026 - June 2026

- Developed an AI-powered chatbot using Retrieval-Augmented Generation (RAG) to answer queries from legal documentation and internal knowledge bases.
- Designed and implemented document ingestion pipelines, including document processing, text chunking, embedding generation, and semantic retrieval workflows using Vector Databases.
- Integrated Large Language Models (LLMs) with retrieval pipelines to deliver accurate, context-aware responses.

Full Stack Developer

Pentabay Softwares • July 2025 - February 2026

- * Developed and deployed scalable full-stack web applications for corporate clients, focusing on performance, maintainability, and scalability.
- * Contributed to the TelemedMD Portal (MERN Stack), implementing new features, integrating RESTful APIs, and optimizing frontend performance using React, Node.js, Express, and MongoDB.
- * Developed scalable RESTful endpoints for a Flight Ticket Management API based on a microservices architecture, ensuring modularity and maintainability.

Store Assistant

Continente • July 2024 - August 2024

- Managed product organization, restocking, and inventory control while assisting customers and ensuring operational efficiency.

Activity Monitor

ATL Santa Rita • July 2022 - August 2022

- Led educational and recreational activities for children, coordinated communication with parents, ensured a safe and engaging environment.

EDUCATION

Computer Engineering

Polytechnic Institute of Porto (ISEP) | Bachelor's Degree • Sep 2023 - Jun 2026

Science and Technology

Vitorino Nemésio Secondary School | High School Diploma • Jul 2023

SKILLS

Technical

Programming Languages: C# • Java • JavaScript • Python • SQL

Frameworks & Libraries: .NET • Entity Framework • React • Node.js • Express • Spring Boot

Web Technologies: HTML • CSS • RESTful APIs

Databases: MongoDB • Vector Databases

Artificial Intelligence: Retrieval-Augmented Generation (RAG) • Large Language Models (LLMs) • Embeddings • Semantic Search • AI Automation • Document Processing

DevOps: Docker • Git • CI/CD • PM2

Tools

Development: Visual Studio • Visual Studio Code

Version Control: Git • GitHub • Bitbucket

API Development & Testing: Postman • Swagger

Containers & Deployment: Docker • PM2

AI & LLM Frameworks: Gemini API • LlamaIndex • Ollama

Databases: MongoDB Compass • Qdrant

Cloud: AWS

Soft

Problem Solving

Analytical Thinking

Effective Communication

Team Collaboration

Time Management

Organization
